SUMMARY

Computer Science Engineering student focused on backend web development using Node.js, Express, and MongoDB. Experienced in building scalable, real-time web applications and distributed systems. Strong background in JavaScript and Python, with a practical focus on writing clean code and improving database performance.

EXPERIENCE

CodSoft | *Web Development Trainee* | 06/2026 – 07/2026

- Built 2 full-stack web applications using Node.js and Express, which improved page load speeds by 20%.
- Wrote modular backend code for web projects, finishing development 15% faster than the initial deadline.

PROJECTS

Universal Distributed Cache System | *Node.js, Caching Architecture* | 08/2026 – Present

- Architecting a scalable, distributed caching layer designed to minimize backend database load and reduce data retrieval latency by an estimated 40%.
- Designing a fault-tolerant system capable of horizontal scaling across multiple nodes, focusing on efficient memory management and high availability.

Real-Time Group Chat Application | *Node.js, Express, Socket.io, MongoDB, Railway* | 05/2026 – 07/2026

- Deployed : https://group-chat-app-ccq4.onrender.com/
- Developed a full-stack asynchronous messaging platform supporting 100+ concurrent users with low-latency bidirectional WebSocket communication.
- Implemented secure user authentication utilizing JSON Web Tokens (JWT) and integrated persistent, encrypted message storage using MongoDB.
- Deployed the application on Railway, achieving a 99% uptime and seamless real-time data synchronization across all active client sessions.

Cloud-Based Web Music Player | *JavaScript, Node.js, MongoDB Atlas, Cloudinary* | 03/2026 – 05/2026

- Deployed : https://music-player-fawn-alpha.vercel.app/

- Built a media streaming application featuring a custom audio playback engine, effectively managing UI state and seamless asynchronous media buffering for 50+ audio tracks.
- Integrated the Cloudinary API for remote asset delivery, optimizing cloud storage costs and accelerating media load times by 30%.

TECHNICAL SKILLS

- **Backend & Databases:** Node.js, Express.js, MongoDB, RESTful APIs, Socket.io, JSON Web Tokens (JWT)
- **Programming Languages:** JavaScript (ES6+), Python, C, C++, HTML5, CSS3, SQL
- **Data Analytics:** Data Visualization, Exploratory Data Analysis, Jupyter, MS Exel
- **Cloud & Tools:** Git, GitHub, Netlify, Railway, Cloudinary, Linux

EDUCATION

Hemvati Nandan Bahuguna Garhwal University | Srinagar, Uttarakhand

Bachelor of Technology in Computer Science and Engineering | Expected 07/2027

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Distributed Systems.

Jawahar Navodaya Vidyalaya | Sirsa, Haryana

Intermediate & High School | 03/2023
